

TRANSPIDER

INDUSTRIAL SERVICES CORPORATION

Corporate Capability Profile 2026

Industrial Services • Materials Handling • Maintenance • Fabrication • Civil Works • Workforce Support

Solutions with Integrity - plant-floor experience, disciplined execution, and accountable completion.

Integrated Industrial Solutions

CORPORATE PROFILE

Built From Plant Experience

A corporate profile for companies that value continuity, accountability, and work that gets finished.

Transpider supports manufacturing and industrial sites through supervised manpower, materials handling, maintenance, fabrication, civil works, janitorial, bottle handling, and production support services.

OPERATING HISTORY

Corporate foundation

SEC-registered since 2010 with services rooted in maintenance, hauling, machining, fabrication, and plant support.

PRODUCTION-LINE DNA

A name from the plant floor

The Transpider name traces to a transfer spider mechanism and a practical machine improvement born from bottling-line work.

CLIENT EXPERIENCE

Industrial client exposure

Experience includes GSMI, San Miguel Corporation, Coca-Cola Bottlers Philippines, IDPI, Nutrilicious, and active plant-site assignments.

SITE EXECUTION

Accountability on the floor

Field work is supervised, recorded, coordinated with client teams, and followed through until concerns are closed.

Brand position:

A plant-support company built to stay accountable from deployment to completion.

The Original Transpider Story

A name that came from solving real operational problems.

Transpider was not built from a brochure idea. It was shaped by bottling-line experience — watching how machines fail, how manpower gaps affect production, and how practical revisions keep operations moving.

TRANSFER SPIDER ROOTS

Origin with meaning

The name carries the memory of a machine problem, a practical improvement, and the discipline to solve what affects the line.

OVERHAUL EXPERIENCE

Machines, not just manpower

Project history includes bottle washers, fillers, conveyors, carrier chains, platforms, tanks, piping, and production-area revisions.

IMPROVEMENT CULTURE

Revise what affects operations

When a machine, area, or workflow needs adjustment, Transpider's instinct is to correct, improve, and keep the work moving.

FIELD POSITION

A site-support partner

This background keeps the company grounded as both a manpower provider and technical plant-support partner.

What clients should feel: this team understands the plant floor.

Track Record Without Noise

A concise view of Transpider's operating history and service capacity.

2010

SEC-registered operating history

15+

years of industrial services experience

450+

personnel and site-deployed workforce capacity

5+

major client groups and plant environments served

Transpider's strength is practical execution: mobilizing people, supervising work, coordinating with client teams, and responding when operations require support beyond the original scope.

CAPABILITY AREA **Plant-floor origin**

Machine-level experience in bottling, maintenance, overhauling, and plant improvement works.

CAPABILITY AREA **Corporate client exposure**

Experience with established manufacturing groups, including GSMI and San Miguel-related operations.

CAPABILITY AREA **Multi-service capability**

Manpower, forklift operations, janitorial, fabrication, civil works, plumbing, electrical, and maintenance support.

CAPABILITY AREA **Site accountability**

Supervisor-led execution, attendance tracking, safety coordination, reporting, and client coordination.

CAPABILITY AREA **Continuity mindset**

Built to reduce gaps in manpower, equipment support, housekeeping, production assistance, and technical response.

CAPABILITY AREA **Practical improvement culture**

Willingness to revise, fabricate, repair, and improve operational systems instead of only supplying people.

Built for work that continues after the proposal is approved.

Mission, Vision & Work Standard

The brand is simple: Solutions with Integrity - dependable field execution, practical technical work, and accountability where the work is done.

VISION

To be the industrial support partner clients keep because the work remains dependable after deployment — safe, supervised, and consistent across plant operations.

MISSION

To protect plant continuity by providing skilled manpower, practical technical work, and accountable site supervision that helps clients finish production, maintenance, facility, and support requirements safely and on schedule.

Work Standard

- | | | |
|----|-------------------------------------|--|
| 01 | Prepared Deployment | right people, task, schedule, and PPE |
| 02 | Safety & Site Discipline | respect client rules and control risks |
| 03 | Practical Problem-Solving | revise, fabricate, repair, and improve what affects operations |
| 04 | Clear Documentation | record, report, escalate, and close concerns |
| 05 | Solutions with Integrity | solve responsibly and remain accountable to completion |

Service Portfolio

A compact service model for sites that need continuity, control, and responsive technical support — without overcomplicating the engagement.

01 Materials Handling

Warehouse movement, pallet handling, production support, and plant logistics coordination.

02 Forklift Rental & Operations

Forklift deployment, skilled operators, routine checking, and site-supervised operation.

03 Industrial Maintenance

Preventive, corrective, and machine-improvement works for critical plant operations.

04 Janitorial & Allied Services

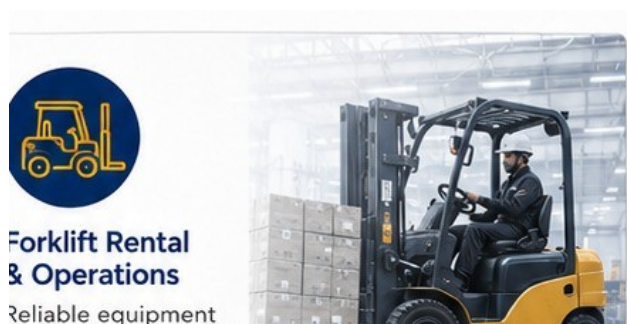

Industrial cleaning, housekeeping, sanitation, waste support, and facility orderliness.

05 Fabrication, Civil & MEP Works

Custom fabrication, machine supports, renovations, plumbing, electrical, and plant improvements.

06 Logistics & Workforce Support

Flexible deployment of manpower and support teams based on operational requirements.

Services may be deployed independently or bundled into a single site-support engagement when the operation requires it.

Why Technical History Matters

It separates Transpider from contractors that only send people.

Machine Overhauling

Bottle washers, fillers, conveyors, carrier chains, and production support equipment.

Operational Revisions

Reconfiguration, redesign, and adjustment works for machines that need practical reliability improvements.

Fabrication & Installation

Platforms, catwalks, supports, guards, tanks, piping, and production-area improvements.

Civil, Plumbing & Electrical

Renovations, site modifications, plumbing, electrical works, and facilities-support execution.

The credibility is practical: Transpider understands both manpower control and the plant work behind it.

Major Operating Highlight: Cauayan

The largest Transpider site-support engagement — built around plant continuity, practical technical response, and daily execution.

Flagship Plant-Support Engagement

Cauayan Plant | 121 Manning

Janitorial • Production • Sorting • Engineering • Renovation • Fabrication • Hauling • Overhauling • Commissioning • Ducting

2016–Present | Operating support strengthened from 2018 onward

01 Whole-plant support

Transpider supports daily plant needs across manpower, operations, engineering, and facility works.

02 Technical execution

Overhauling, commissioning, machine revisions, fabrication, ducting, and plant improvements.

03 Materials handling fleet

Approximately 6 diesel forklifts and 2 electric forklifts support daily movement and production flow.

04 Trusted to step up

The engagement began from difficult operational requirements and continued because the work was followed through.

Transpider's credibility is not only in manpower count. It is in being present when plant requirements expand — and staying accountable until the work is finished.

How We Make Reliability Visible

Clients do not need promises. They need a system that keeps the work under control.

Transpider's site model is built around daily execution: assign, supervise, document, correct, and close. That is how outsourced work becomes dependable.

- 1 Deployment Planning** Manpower prepared before the work begins.

- 2 Site Supervision** Leads and supervisors monitor actual floor conditions.

- 3 Daily Records** Attendance, work status, and issues are documented.

- 4 Corrective Action** Concerns are corrected, not ignored.

- 5 Completion Check** Tasks are followed through until the work is closed.

Major Site Engagements

A concise view of the active plant support history behind the brand.

2016–Present — Cauayan Plant — 121 Manning

Whole-operation support across janitorial, production, sorting, engineering, renovation, improvements, fabrication, hauling, overhauling, commissioning, ducting, and forklift operations.

2016/2018–Present — Ligao Plant — 171 Employees

Comprehensive plant support with janitorial, production, sorting, engineering, improvements, and forklift operations.

2024–Present — GSMI Cabuyao Plant — 70 Employees

Janitorial, drivers, logistics support, sorting/repalleting, and assistance in delivering goods to agents.

2025–Present — GSMI Lucena Plant - 80 Employees

2025 start-up support for bottle sorting, washing, and forklift operations with 80 employees and one diesel forklift.

Fleet Support — Cauayan & Ligao

Approximately 6 diesel forklifts and 2 electric forklifts per site supporting daily materials movement.

Multiple Years — Bottle washer overhauling & machine works

Bottle washer overhauling, production-machine revisions, commissioning, and reliability improvements.

Project Works — Civil, MEP, ducting & fabrication works

Civil works, renovations, plumbing, electrical, ducting, fabrication, and plant improvements.

This is the real Transpider profile: not one type of work, but a plant-support partner trusted to handle the needs that keep operations moving.

Operating Capability

Resources and teams structured for industrial service delivery — with emphasis on supervision, continuity, and completion.

CAPABILITY

Workforce

Site-deployed teams across Cauayan (121), Ligao (171), Cabuyao (70), Lucena (80), and other support assignments — supervisors, operators, drivers, sorters, janitorial, logistics, and technical crews.

CAPABILITY

Equipment Support

Forklift operations with diesel and electric units, plus welding, cutting, fabrication, hauling, and shop-based support tools.

CAPABILITY

Technical Capability

Bottle washer work, overhauling, commissioning, production-machine revisions, ducting, platforms, piping, fabrication, and plant improvements.

CAPABILITY

Site Deployment

Flexible deployment based on actual plant demand: manpower, equipment, technical works, civil works, and daily operations support.

Capability matters because Transpider is often called when requirements expand beyond the original scope — and the work still has to be finished.

Where Transpider Protects the Operation

The work is not only supplying people. The work is helping the site avoid disruption.

Manpower Gaps

relievers, deployment control, and supervision

Production Disruption

support teams aligned with daily plant flow

Safety Exposure

PPE discipline, orientation, and corrective action

Poor Housekeeping

clean, organized, safe facility support

Slow Response

direct coordination and hands-on site escalation

Unclear Accountability

records, reporting, and supervisor-led execution

Solutions with Integrity

Solve operational problems with clear ownership, site discipline, and accountability to completion.

Industries Served

Built for industrial environments where uptime, safety, and manpower continuity matter.

01 Food & Beverage Manufacturing

02 Warehousing & Distribution

03 Bottle Washing & Sorting

04 Industrial Plants

05 Logistics Operations

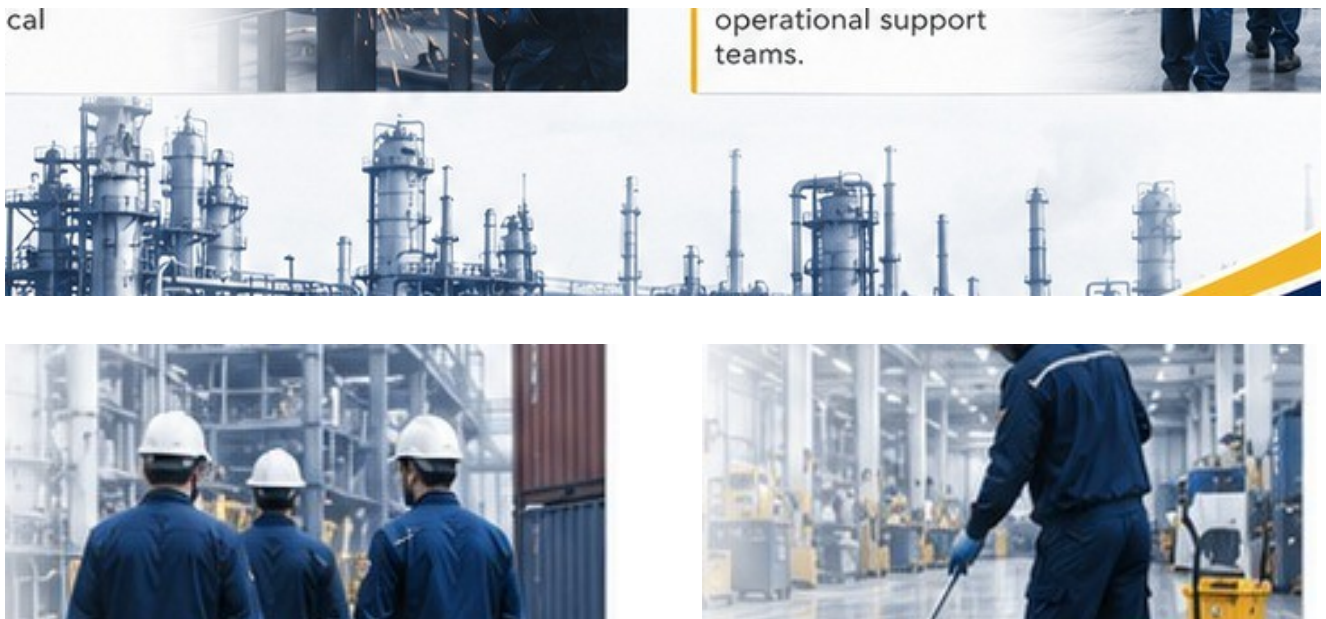

06 Plant Facility Support

07 Fabrication, Plumbing & Electrical

08 Civil Works & Plant Renovations

09 Machine Overhauling & Revisions

10 Operational Outsourcing

Primary client value: fewer service gaps, stronger site accountability, and reliable support for daily plant operations.
